City Fights: Debates on Urban Sustainability

Susannah Hagan

City Fights: Debates on Urban Sustainability Susannah Hagan

Within the concept of the 'sustainable city' nothing is fixed, mapped or agreed upon. To some, the term encompasses innovation, change and commitment to the future and to others it means preservation, conservatism and a watchful eye on the future.

City Fights follows on from the symposium 'Energy and Urban Strategies', which brought together contributors from a wide variety of disciplines, with the aim of developing sharp ideas about making better and more sustainable cities in environmental, social and economic terms. The result is a passionate and illuminating debate on this vast question, bringing into focus the complexity and diversity of the issues involved.

City fights is essential and thought provoking reading for all with a common interest in the future of the city- from architects and urban designers, urban and town planners and policy makers, to academics and researchers, sociologists, environmentalists and economists.
