"Knowledge and Information Awareness" zur Förderung computerunterstützter Kollaboration (German Edition) Janusch Sieber

Studienarbeit aus dem Jahr 2007 im Fachbereich Psychologie - Medienpsychologie, Note: 1,0, Eberhard-Karls-Universität Tübingen (Psychologisches Institut), Veranstaltung: Projektarbeit Wissenskommunikation, Sprache: Deutsch, Abstract: In der heutigen Informationsgesellschaft wird Computer-unterstütztes kollaboratives Lernen immer wichtiger. Es gibt dabei jedoch einige Probleme, die insbesondere die Interaktion der Gruppenmitglieder betreffen. Den Problemen wird unter anderem durch implizite Methoden begegnet, die verschiedene Aspekte der Awareness fördern sollen. Eine neu entwickelte Möglichkeit stellt hierbei ein Tool dar, das „Knowledge and Information Awareness“ unterstützt. Darunter wird die Awareness über das Wissen der Kooperationspartner und über dem Wissen zu Grunde liegender Informationen verstanden. Erste Studien zeigen die Effektivität dieser Awareness für Computer-unterstütztes kollaboratives Problemlösen im Kontext von Ressourcen-basiertem Lernen. Ziel des angestrebten Projekts ist es, mögliche Wirkmechanismen des „Knowledge and Information Awareness“-Tools zu erforschen und Aussagen über geeignete Einsatzgebiete zu treffen. In vier experimentellen Studien sollen folgende Einflussfaktoren systematisch untersucht werden: Abrufbarkeit von Hintergrund-informationen, ungeteiltes Wissen, Aufgabentyp sowie Tool-Eigenschaften und common ground Bildung
