Plastics in Building Structures covers the proceedings of a conference, held in London on June 14-16, 1965. This conference focuses on the applications of plastics materials in structures.

This book emerged from 39 papers presented at the conference. The introductory papers describe the properties of plastics in relation to building structures, and the economic aspects, fire regulations, and flammability of these materials. Considerable papers are devoted to various areas of application of plastics, including adhesives, polymer cements, cored chipboard units, and glued timber. These topics are followed by discussions on the characterization, design, and structural and physical properties of plastics. The final chapters review the commercial development and applications of plastic materials.

This book will prove useful to engineers, designer, manufacturers, and researchers in the allied fields.
