William E. Baylis

Clifford (Geometric) Algebras With Applications in Physics, Mathematics, and Engineering William E. Baylis

This volume is an outgrowth of the 1995 Summer School on Theoretical Physics of the Canadian Association of Physicists (CAP), held in Banff, Alberta, in the Canadian Rockies, from July 30 to August 12, 1995. The chapters, based on lectures given at the School, are designed to be tutorial in nature, and many include exercises to assist the learning process. Most lecturers gave three or four fifty-minute lectures aimed at relative novices in the field. More emphasis is therefore placed on pedagogy and establishing comprehension than on erudition and superior scholarship. Of course, new and exciting results are presented in applications of Clifford algebras, but in a coherent and user-friendly way to the nonspecialist. The subject area of the volume is Clifford algebra and its applications. Through the geometric language of the Clifford-algebra approach, many concepts in physics are clarified, united, and extended in new and sometimes surprising directions. In particular, the approach eliminates the formal gaps that traditionally separate classical, quantum, and relativistic physics. It thereby makes the study of physics more efficient and the research more penetrating, and it suggests resolutions to a major physics problem of the twentieth century, namely how to unite quantum theory and gravity. The term "geometric algebra" was used by Clifford himself, and David Hestenes has suggested its use in order to emphasize its wide applicability, and because the developments by Clifford were themselves based heavily on previous work by Grassmann, Hamilton, Rodrigues, Gauss, and others.

From reader reviews:

Clarence Kissel:

Do you one among people who can't read pleasurable if the sentence chained inside straightway, hold on guys that aren't like that. This Clifford (Geometric) Algebras With Applications in Physics, Mathematics, and Engineering book is readable by you who hate the perfect word style. You will find the facts here are arrange for enjoyable reading through experience without leaving actually decrease the knowledge that want to provide to you. The writer of Clifford (Geometric) Algebras With Applications in Physics, Mathematics, and Engineering content conveys the thought easily to understand by most people. The printed and e-book are not different in the content but it just different in the form of it. So , do you nevertheless thinking Clifford (Geometric) Algebras With Applications in Physics, Mathematics, and Engineering is not loveable to be your top listing reading book?

Sandra Leggett:

Reading a publication tends to be new life style on this era globalization. With looking at you can get a lot of information which will give you benefit in your life. Using book everyone in this world may share their idea. Guides can also inspire a lot of people. A lot of author can inspire their reader with their story or perhaps their experience. Not only the storyline that share in the books. But also they write about advantage about something that you need illustration. How to get the good score toefl, or how to teach your young ones, there are many kinds of book which exist now. The authors nowadays always try to improve their talent in writing, they also doing some study before they write on their book. One of them is this Clifford (Geometric) Algebras With Applications in Physics, Mathematics, and Engineering.

Shirley Eagle:

Reading a book for being new life style in this yr; every people loves to examine a book. When you study a book you can get a great deal of benefit. When you read ebooks, you can improve your knowledge, simply because book has a lot of information into it. The information that you will get depend on what sorts of book that you have read. If you need to get information about your study, you can read education books, but if you want to entertain yourself look for a fiction books, this sort of us novel, comics, and also soon. The Clifford (Geometric) Algebras With Applications in Physics, Mathematics, and Engineering will give you new experience in reading a book.

Curtis Waters:

In this era globalization it is important to someone to obtain information. The information will make anyone to understand the condition of the world. The health of the world makes the information easier to share. You can find a lot of referrals to get information example: internet, paper, book, and soon. You can view that now, a lot of publisher in which print many kinds of book. The book that recommended to you personally is Clifford (Geometric) Algebras With Applications in Physics, Mathematics, and Engineering this e-book

consist a lot of the information on the condition of this world now. This particular book was represented how does the world has grown up. The vocabulary styles that writer value to explain it is easy to understand. The actual writer made some analysis when he makes this book. This is why this book suitable all of you.
