This is a practical, hands-on tutorial based on real-world applications, using real-world 3rd Party APIs, teaching the essential tricks to get started in building location aware apps for Windows Phone. With plenty of images and code wherever necessary, this book will take you just a few days to get up to speed, no long weekend classes, no bible to read, a few chapters and you are off. If you are a developer who wants to develop apps for the Windows Phone 7 platform, but do not know where to begin, then this book is for you. Developers working on the Android and iPhone platform wishing to port their apps on the Windows Phone ecosystem will also find this book useful. The bundled code and apps can also help a non-developer; a smart business or sales person to quickly analyze and build new applications. This book is also aimed at Managers and Architects in the News and Entertainment industry; since two giants of this industry (Eventful.com and Patch.com) are mentioned extensively within the book.
