## Economics-Driven Software Architecture

*Economics-driven Software Architecture* presents a guide for engineers and architects who need to understand the economic impact of architecture design decisions: the long term and strategic viability, cost-effectiveness, and sustainability of applications and systems. Economics-driven software development can increase quality, productivity, and profitability, but comprehensive knowledge is needed to understand the architectural challenges involved in dealing with the development of large, architecturally challenging systems in an economic way.

This book covers how to apply economic considerations during the software architecting activities of a project. Architecture-centric approaches to development and systematic evolution, where managing complexity, cost reduction, risk mitigation, evolvability, strategic planning and long-term value creation are among the major drivers for adopting such approaches. It assists the objective assessment of the lifetime costs and benefits of evolving systems, and the identification of legacy situations, where architecture or a component is indispensable but can no longer be evolved to meet changing needs at economic cost. Such consideration will form the scientific foundation for reasoning about the economics of nonfunctional requirements in the context of architectures and architecting.

- Familiarizes readers with essential considerations in economic-informed and value-driven software design and analysis
- Introduces techniques for making value-based software architecting decisions
- Provides readers a better understanding of the methods of economics-driven architecting

### From reader reviews:

#### Adam Schneider:

Reading a reserve can be one of a lot of task that everyone in the world adores. Do you like reading book so. There are a lot of reasons why people like it. First reading a publication will give you a lot of new info. When you read a guide you will get new information mainly because book is one of various ways to share the information or maybe their idea. Second, examining a book will make you more imaginative. When you studying a book especially fiction book the author will bring someone to imagine the story how the character types do it anything. Third, you may share your knowledge to other people. When you read this Economics-Driven Software Architecture, you could tells your family, friends and soon about yours e-book. Your knowledge can inspire others, make them reading a book.

#### Kim Marshall:

Can you one of the book lovers? If yes, do you ever feeling doubt when you find yourself in the book store? Try to pick one book that you just dont know the inside because don't judge book by its deal with may doesn't work the following is difficult job because you are afraid that the inside maybe not while fantastic as in the outside appearance likes. Maybe you answer might be Economics-Driven Software Architecture why because the great cover that make you consider about the content will not disappoint a person. The inside or content is actually fantastic as the outside or cover. Your reading sixth sense will directly assist you to pick up this book.

#### Phil Garcia:

In this era globalization it is important to someone to acquire information. The information will make someone to understand the condition of the world. The healthiness of the world makes the information much easier to share. You can find a lot of personal references to get information example: internet, newspaper, book, and soon. You can view that now, a lot of publisher that will print many kinds of book. The particular book that recommended to you is Economics-Driven Software Architecture this reserve consist a lot of the information with the condition of this world now. That book was represented just how can the world has grown up. The dialect styles that writer require to explain it is easy to understand. The particular writer made some study when he makes this book. That's why this book appropriate all of you.

#### Gordon Rollins:

As a scholar exactly feel bored in order to reading. If their teacher questioned them to go to the library in order to make summary for some guide, they are complained. Just very little students that has reading's heart and soul or real their hobby. They just do what the trainer want, like asked to go to the library. They go to there but nothing reading critically. Any students feel that examining is not important, boring along with can't see colorful pictures on there. Yeah, it is for being complicated. Book is very important for you personally. As we know that on this period of time, many ways to get whatever you want. Likewise word says, many ways to reach Chinese's country. So , this Economics-Driven Software Architecture can make

you feel more interested to read.
