Elementary Differential Equations with Boundary Value Problems (4th Edition)

William R. Derrick, Stanley I. Grossman

Elementary Differential Equations with Boundary Value Problems (4th Edition) William R. Derrick, Stanley I. Grossman

Differential equations are of fundamental importance in the applications of mathematics to the physical and biological sciences. This text provides an elementary but cohesive development of the topic. The primary goal of the book is to teach students how to use differential equations in applied areas. To this end, the book includes more than 400 worked examples and 2500 exercises, chapter summaries that include a review of the important concepts, chapter review exercises, self-quiz problems, numerous applications in various fields, a section in each chapter on solving problems using symbolic manipulators such as Mathematica, MAPLE, and DERIVE, and a manual for such solutions. *The First Chapter is motivated by first order linear methods. *Separation of Variables discussion has been moved from Chapter 1 to 2. *Early Introduction to Numerical Methods - Euler's method is discussed in Section 1.4, giving the student an early look at approximation followed by a thorough treatment of this topic in Chapter 8. *This edition has a great deal of coverage and attention to computer algebra systems and how they can be used in differential equations to help solve problems. "Generic" CAS code is found at the ends of many chapters along with a manual providing specific Mathematica, Maple, and Derive coverage. *Self-tests, chapter summaries, and titled examples. *Three sections of the book, 1.1, 2.3, and 4.3 are devoted to mathematical modeling where students are asked to question the reasonableness of models. *More illustrations, many of which are graphs of solutions to examples. *Outstanding Applications - diverse, interesting, and referenced. Theory is secondary to the goal of applying the mathematics to problems that students who take the course will be solving. *Historical Notes and biographical sketches of some of the mathematicians who have made significant contributions to calculus and differential equations add a human dimension often lacking in such books. *Perspectives explore topics from a different point of view and in more depth.

From reader reviews:

Howard Martinez:

What do you think of book? It is just for students since they are still students or the item for all people in the world, what the best subject for that? Merely you can be answered for that query above. Every person has various personality and hobby for each and every other. Don't to be obligated someone or something that they don't want do that. You must know how great and also important the book Elementary Differential Equations with Boundary Value Problems (4th Edition). All type of book can you see on many solutions. You can look for the internet sources or other social media.

Michael Short:

Now a day people that Living in the era everywhere everything reachable by match the internet and the resources inside can be true or not involve people to be aware of each info they get. How a lot more to be smart in having any information nowadays? Of course the answer is reading a book. Looking at a book can help men and women out of this uncertainty Information particularly this Elementary Differential Equations with Boundary Value Problems (4th Edition) book because book offers you rich facts and knowledge. Of course the details in this book hundred percent guarantees there is no doubt in it as you know.

Julie Gooch:

Playing with family in a very park, coming to see the marine world or hanging out with friends is thing that usually you may have done when you have spare time, then why you don't try matter that really opposite from that. One particular activity that make you not experience tired but still relaxing, trilling like on roller coaster you have been ride on and with addition info. Even you love Elementary Differential Equations with Boundary Value Problems (4th Edition), you are able to enjoy both. It is fine combination right, you still desire to miss it? What kind of hang-out type is it? Oh can happen its mind hangout people. What? Still don't obtain it, oh come on its referred to as reading friends.

Robert Hill:

It is possible to spend your free time to study this book this book. This Elementary Differential Equations with Boundary Value Problems (4th Edition) is simple to bring you can read it in the area, in the beach, train and also soon. If you did not get much space to bring the printed book, you can buy the actual e-book. It is make you simpler to read it. You can save the book in your smart phone. Therefore there are a lot of benefits that you will get when one buys this book.
