Engineering Science 2 Checkbook J O Bird, A J C May

Engineering Science 2: Checkbook provides worked and unworked problems concerning a.c./d.c. electrical circuits, electromagnetism, statics, dynamics, energy, and machines.

The 14 chapters of the book are organized into three sections. Section A covers electricity, which includes simple d.c. circuits, electromagnetism, and electromagnetic induction. Section B discusses statics and dynamics, such as the effects of forces on materials; forces acting at a point; and linear and angular motion. Section C deals with energy and machine; this section includes work and energy, thermal expansion, and simple machines.

The text will be of great use to electrical engineering students who wish to enhance their understanding of the basics of mechanical and electrical science.
