Space Weather (Springer Praxis Books)

Volker Bothmer, Ioannis A. Daglis

Space Weather (Springer Praxis Books) Volker Bothmer, Ioannis A. Daglis

The editors present a state-of-the-art overview on the Physics of Space Weather and its effects on technological and biological systems on the ground and in space. It opens with a general introduction on the subject, followed by a historical review on the major developments in the field of solar terrestrial relationships leading to its development into the up-to-date field of space weather. Specific emphasis is placed on the technological effects that have impacted society in the past century at times of major solar activity. Chapter 2 summarizes key milestones, starting from the base of solar observations with classic telescopes up to recent space observations and new mission developments with EUV and X-ray telescopes (e.g., STEREO), yielding an unprecedented view of the sun-earth system. Chapter 3 provides a scientific summary of the present understanding of the physics of the sun-earth system based on the latest results from spacecraft designed to observe the Sun, the interplanetary medium and geospace. Chapter 4 describes how the plasma and magnetic field structure of the earth's magnetosphere is impacted by the variation of the solar and interplanetary conditions, providing the necessary science and technology background for missions in low and near earth's orbit. Chapter 5 elaborates the physics of the layer of the earth's upper atmosphere that is the cause of disruptions in radio-wave communications and GPS (Global Positioning System) errors, which is of crucial importance for projects like Galileo. In Chapters 6-10, the impacts of technology used up to now in space, on earth and on life are reviewed.

From reader reviews:

David Boggs:

What do you regarding book? It is not important with you? Or just adding material if you want something to explain what yours problem? How about your time? Or are you busy man? If you don't have spare time to try and do others business, it is make one feel bored faster. And you have free time? What did you do? Every person has many questions above. They need to answer that question due to the fact just their can do which. It said that about guide. Book is familiar in each person. Yes, it is correct. Because start from on jardín de infancia until university need this Space Weather (Springer Praxis Books) to read.

Janice Pyles:

Spent a free time for you to be fun activity to perform! A lot of people spent their free time with their family, or their own friends. Usually they undertaking activity like watching television, planning to beach, or picnic within the park. They actually doing same every week. Do you feel it? Do you want to something different to fill your free time/ holiday? May be reading a book is usually option to fill your totally free time/ holiday. The first thing that you ask may be what kinds of publication that you should read. If you want to try look for book, may be the reserve untitled Space Weather (Springer Praxis Books) can be excellent book to read. May be it is usually best activity to you.

Gerald Reed:

People live in this new time of lifestyle always aim to and must have the time or they will get large amount of stress from both way of life and work. So , once we ask do people have free time, we will say absolutely indeed. People is human not a robot. Then we consult again, what kind of activity do you have when the spare time coming to a person of course your answer will probably unlimited right. Then ever try this one, reading books. It can be your alternative throughout spending your spare time, the actual book you have read will be Space Weather (Springer Praxis Books).

Meghan Drucker:

Playing with family in the park, coming to see the sea world or hanging out with pals is thing that usually you will have done when you have spare time, in that case why you don't try point that really opposite from that. Just one activity that make you not experience tired but still relaxing, trilling like on roller coaster you are ride on and with addition info. Even you love Space Weather (Springer Praxis Books), you are able to enjoy both. It is very good combination right, you still would like to miss it? What kind of hang type is it? Oh occur its mind hangout fellas. What? Still don't have it, oh come on its referred to as reading friends.
