Tropical Rain Forests: An Ecological and Biogeographical Comparison

Richard B. Primack, Richard T. Corlett

Tropical Rain Forests: An Ecological and Biogeographical Comparison Richard B. Primack, Richard T. Corlett

The popular view of the tropical rainforest as a monolithic tangle of rain-soaked trees, vines, birds, monkeys and big cats is a widespread myth. *Tropical Rain Forests: An Ecological and Biogeographical Comparison* explodes that myth by showing that rain forests in different tropical regions are unique despite superficial similarities.

Written by two leading figures in the field, this essential new volume:

- Emphasizes the distinctive characteristics of rain forests in tropical Asia, tropical America, Africa, Madagascar, New Guinea, and Australia
- Begins with an introduction to the climate, biogeographic history, and environment of tropical rain forests
- Presents an extended cross-continental treatment of major animal and plant groups
- Outlines a research program involving cross-continental comparisons
- Considers the impact of people on tropical forests and discusses conservation strategies based upon the characteristics of particular regions rather than a one-size-fits-all approach
- Includes natural history examples, figures, and a stunning collection of color photographs
