Surgical Management of Hepatobiliary and Pancreatic Disorders (Clinical challenges) Leslie H Blumgart MD FACS FRCS FRCPS

Hepato-pancreato-biliary (HPB) surgery is firmly established within the repertoire of modern general surgery. There are now specific teams for both pancreatic and liver surgery, but day-to-day management and decision-making for patients with these disorders remains the remit of the general surgeon and presents often highly complex clinical scenarios. Surgical Management of Hepatobiliary and Pancreatic Disorders is a detailed guide to management in problems arising from cancer, trauma, cysts and other conditions, both acute and chronic. It explores the spectrum of common HPB diseases that will confront the general surgeon. It is an ideal reference tool for surgeons in practice and in training.
