Laboratory And Field Investigations In Marine Life Gordon Dudley, James L. Sumich, Virginia L. Cass-Dudley

This unique marine biology laboratory and field manual engages students in the excitement and challenges of understanding marine organisms and the environments in which they live. Students will benefit from a thorough examination of topics such as the physical and chemical properties of seawater, marine microbes, algae, and a wide variety of invertebrate and vertebrate animals through observation and critical thinking activities. The manual also includes suggested topics for additional investigation, which provides flexibility for both instructors and students who wish to further explore various topics of interest. Laboratory and Field Investigations in Marine Life is the ideal compliment to any marine biology teaching and learning package.
