Posturologie clinique: Dysfonctions motrices et cognitives (French Edition) API, Bernard Weber, Philippe Villeneuve

Les XIIIes Journées de l'Association Posturologie internationale ont rassemblé des données récentes sur l'intérêt que présente une approche posturale hors de son champ habituel : la dyslexie de développement et la prévention des chutes du sujet vieillissant.

Les techniques orthophoniques de rééducation relèvent d'approches théoriques et pratiques dont aucune ne fait l'unanimité. Certains spécialistes mettent en cause la vision : le port de prismes de faible puissance s'accompagne d'une amélioration et des capacités de lecture et de la régulation posturale. D'autres soulignent une relative incoordination motrice : des exercices de reprogrammation posturale et/ou le port d'orthèses plantaires complètent l'action des prismes. Ces résultats particuliers renvoient aux relations possibles entre la structuration de la motricité et celle du langage, de l'enfance à l'adolescence.

La régulation posturale est aussi impliquée dans l'évaluation du risque de chute chez le sujet vieillissant. L'examen clinique et l'analyse expérimentale de la marche permettent d'offrir aux personnes âgées, dans une approche posturale du vieillissement, l'aide adaptée à leur état, que leurs difficultés relèvent soit d'une rééducation après un accident aigu soit d'exercices de reprogrammation posturale dans les déficits fonctionnels.

Les perspectives qu'ouvrent ces recherches concernent podologues, orthophonistes et gériatres, mais aussi rééducateurs, kinésithérapeutes, ophtalmologistes et orthoptistes, ostéopathes, médecins scolaires, enseignants d'éducation physique, confrontés au quotidien à ces difficultés, mais également quiconque s'intéresse aux interactions entre cognition et comportement.

Reprise des textes présentés lors des XIIIes journées de l'Association Posturologie Internationale. Dyslexie de développement et prévention des chutes du sujet vieillissant sont les deux grands axes de réflexion.

The Enjoyable option here cannot be questionable, like treasuring beautiful island. Use you still want to miss the item? Find this book in addition to read it from today!

Linda Soto:

As a pupil exactly feel bored to reading. If their teacher inquired them to go to the library or to make summary for some book, they are complained. Just tiny students that has reading's heart and soul or real their pastime. They just do what the trainer want, like asked to go to the library. They go to generally there but nothing reading significantly. Any students feel that looking at is not important, boring and can't see colorful images on there. Yeah, it is to be complicated. Book is very important for yourself. As we know that on this

era, many ways to get whatever you want. Likewise word says, ways to reach Chinese's country. Therefore this Posturologie clinique: Dysfonctions motrices et cognitives (French Edition) can make you really feel more interested to read.
