Electromagnetism (Dover Books on Physics)

John C. Slater, Nathaniel H. Frank, Physics

Electromagnetism (Dover Books on Physics) John C. Slater, Nathaniel H. Frank, Physics

Clearly developed from first principles, this introductory study supplies basic material on electrostatics and magnetostatics, then concentrates on electromagnetic theory — the authors are both leading men in the field. The book ranges freely over many areas of electromagnetic theory with some concern for electrical engineering. It covers the field theory of electromagnetism, electrostatics and the equations and theorems of Gauss, Poisson, Laplace and Green, solutions of Laplace's equation, dielectrics, magnetic fields of linear and circular currents, electromagnetic induction and Maxwell's equations, electromagnetic waves, electron theory, wave guides and cavity resonators, spherical electromagnetic waves, Huygen's principle and Green's theorem, and Fresnel and Fraunhofer diffraction. Practice problems are supplied at chapter ends. Physicists and engineers will find this presentation particularly useful; but mathematicians have also used the book not only as an introduction to electromagnetism, but also as a means to an increased knowledge of the aims and tools of theoretical physics. The only background required to follow the development is a knowledge of the calculus and differential equations. More advanced mathematics is developed in appendixes.

Download and Read Free Online Electromagnetism (Dover Books on Physics) John C. Slater, Nathaniel H. Frank, Physics

From reader reviews:

Katherine Levy:

Precisely why? Because this Electromagnetism (Dover Books on Physics) is an unordinary book that the inside of the book waiting for you to snap the idea but latter it will shock you with the secret that inside. Reading this book alongside it was fantastic author who also write the book in such incredible way makes the content within easier to understand, entertaining way but still convey the meaning fully. So , it is good for you because of not hesitating having this any longer or you going to regret it. This excellent book will give you a lot of rewards than the other book have got such as help improving your proficiency and your critical thinking method. So , still want to delay having that book? If I were you I will go to the publication store hurriedly.

David Munsch:

Reading a book for being new life style in this calendar year; every people loves to learn a book. When you examine a book you can get a wide range of benefit. When you read ebooks, you can improve your knowledge, mainly because book has a lot of information into it. The information that you will get depend on what kinds of book that you have read. If you want to get information about your examine, you can read education books, but if you want to entertain yourself you are able to a fiction books, such us novel, comics, and soon. The Electromagnetism (Dover Books on Physics) provide you with a new experience in examining a book.

Peggy Hardman:

This Electromagnetism (Dover Books on Physics) is new way for you who has attention to look for some information mainly because it relief your hunger details. Getting deeper you in it getting knowledge more you know otherwise you who still having small amount of digest in reading this Electromagnetism (Dover Books on Physics) can be the light food for you personally because the information inside this book is easy to get by anyone. These books develop itself in the form that is reachable by anyone, yep I mean in the e-book application form. People who think that in reserve form make them feel sleepy even dizzy this book is the answer. So you cannot find any in reading a book especially this one. You can find what you are looking for. It should be here for a person. So , don't miss this! Just read this e-book type for your better life and also knowledge.

Maria Huffman:

Reading a reserve make you to get more knowledge from it. You can take knowledge and information originating from a book. Book is composed or printed or created from each source this filled update of news. In this particular modern era like at this point, many ways to get information are available for you. From media social similar to newspaper, magazines, science guide, encyclopedia, reference book, story and comic. You can add your knowledge by that book. Are you ready to spend your spare time to open your book? Or

just looking for the Electromagnetism (Dover Books on Physics) when you required it?
