Nursing Practice in Multiple Sclerosis, Third Edition: A Core Curriculum June Halper MSN APN-C MSCN FAAN

This updated edition of the core curriculum for nursing practice with multiple sclerosis (MS) patients presents the most current diagnostic tools and strategies for managing the disease process. It addresses both the physical and psychosocial changes with which MS patients must cope, and focuses on the role of nursing in helping patients to devise, learn, and implement self-care strategies. The book discusses the application of change theory to MS nursing and examines current theories regarding the immunologic bases of MS, its epidemiology, and genetics. Information is presented in an easy-to-read outline format along with case studies that further clarify the material. Each chapter begins with a list of objectives to facilitate learning.

Nursing Practice in Multiple Sclerosis offers a vast reservoir of information for MS nurse specialists and students, providing an excellent day-to-day reference as well as a comprehensive review for nurses who intend to take the MS nursing certification exam. It is a companion volume to *Comprehensive Nursing Care in Multiple Sclerosis* and *Advanced Concepts in Multiple Sclerosis Nursing Care*.

This updated edition includes:

- New diagnostic tests and pharmacologic strategies, including the treatment of acute attacks, immunomodulating and symptomatic therapies, and nonpharmacologic interventions
- Updated guidelines for managing symptoms, such as impaired mobility and bladder/ bowel dysfunction
- A stronger focus on the role of nursing in helping patients to achieve independence, empowerment, and improved quality of life
- New content in ethics, professionalism, and delivering culturally competent care
- Updated references, thought-provoking certification questions, and new case studies
