## **Beyond BIM: Architecture Information Modeling** Danelle Briscoe

*Beyond BIM* explores the vast and under-explored design potential undertaken by information modeling. Through a series of investigations grounded in the analysis of built work, interviews with leading practitioners, and speculative projects, the author catalogs the practical advantages and theoretical implications of exploiting BIM as a primary tool for design innovation. Organized by information type, such as geographic data, local code, or materials, each chapter suggests a realm of knowledge that can be harvested and imported into BIM to give meaningful specificity to architectural form and space. While highly sustainable, the work documented and envisioned in this book moves well beyond 'normalization,' to reveal inventive takes on contemporary practice.

Beyond BIM serves as a primary resource for professional architects from practice, researchers and designers engaged in information related spatial design processes, as well as students and faculties of architecture schools in search of BIM design inspiration. Likewise, those highly attuned to computation and unconventional ways of creating form and space, particularly built outcomes that utilize BIM, will find this book meaningful and essential.

### From reader reviews:

#### **Tom Copper:**

What do you concentrate on book? It is just for students since they are still students or the idea for all people in the world, what the best subject for that? Simply you can be answered for that issue above. Every person has diverse personality and hobby for each other. Don't be pressured someone or something that they don't desire do that. You must know how great as well as important the book Beyond BIM: Architecture Information Modeling. All type of book would you see on many resources. You can look for the internet solutions or other social media.

#### **Eric Freeman:**

What do you in relation to book? It is not important along? Or just adding material when you need something to explain what your own problem? How about your extra time? Or are you busy man or woman? If you don't have spare time to try and do others business, it is make one feel bored faster. And you have extra time? What did you do? Everyone has many questions above. The doctor has to answer that question mainly because just their can do that will. It said that about guide. Book is familiar in each person. Yes, it is proper. Because start from on jardín de infancia until university need this kind of Beyond BIM: Architecture Information Modeling to read.

#### **Stephanie Armstrong:**

Now a day people that Living in the era wherever everything reachable by match the internet and the resources in it can be true or not need people to be aware of each data they get. How many people to be smart in getting any information nowadays? Of course the solution is reading a book. Reading a book can help persons out of this uncertainty Information specially this Beyond BIM: Architecture Information Modeling book because book offers you rich info and knowledge. Of course the data in this book hundred % guarantees there is no doubt in it you know.

#### **William Patterson:**

The e-book untitled Beyond BIM: Architecture Information Modeling is the guide that recommended to you to study. You can see the quality of the guide content that will be shown to you actually. The language that creator use to explained their ideas are easily to understand. The writer was did a lot of analysis when write the book, so the information that they share for you is absolutely accurate. You also will get the e-book of Beyond BIM: Architecture Information Modeling from the publisher to make you more enjoy free time.
